

Urban Foraging - Survival Plants for the 21st Century Hunter and Gatherer

Urban Foraging - Survival Plants for
the 21st Century Hunter and Gatherer
By Scott Davis

Ever wondered if those pesky weeds in
the backyard are edible?

Interested in lowering your monthly
grocery budget?

Looking for a new source of income?

Many people are completely unaware
that many of the wild plants around
their homes are edible, medicinal,
highly-nutritious, and worth money
in the growing wild-crafting industry.
Learn about the region's bounty of wild
edible plants, how to harvest them,
how lucrative foraging can be, and
about the high levels of sustainability
associated with this ancient craft.

Join us for this free
lecture
Thursday, October 12th
7pm -8pm
FSUCML Auditorium

Before Lecture
Open to the Public

About The Speaker:

Scott Davis is a busy biologist, with
Ethnobotany among his passions.
Scott serves as a state board mem-
ber for the Florida Native Plant
Society and is president of the
Magnolia (Tallahassee) Chapter.
In addition to his day job as a
ranger and botanist at St. Marks
National Wildlife Refuge, he serves
as Coordinator for the new Milk-
weed-Monarch Conservation Ini-
tiative, VP for Friends of Wakulla
Springs, VP for the Florida Wild
Mammal Association, and as a
committee member for the FWC
Great Florida Birding Trail and
Black Bear Stakeholders. He also
owns a native plant nursery and is
an officer of a non-profit agency on
urban forest conservation
