U.S. Consulate or Embassy					

## Emergency Management Plan

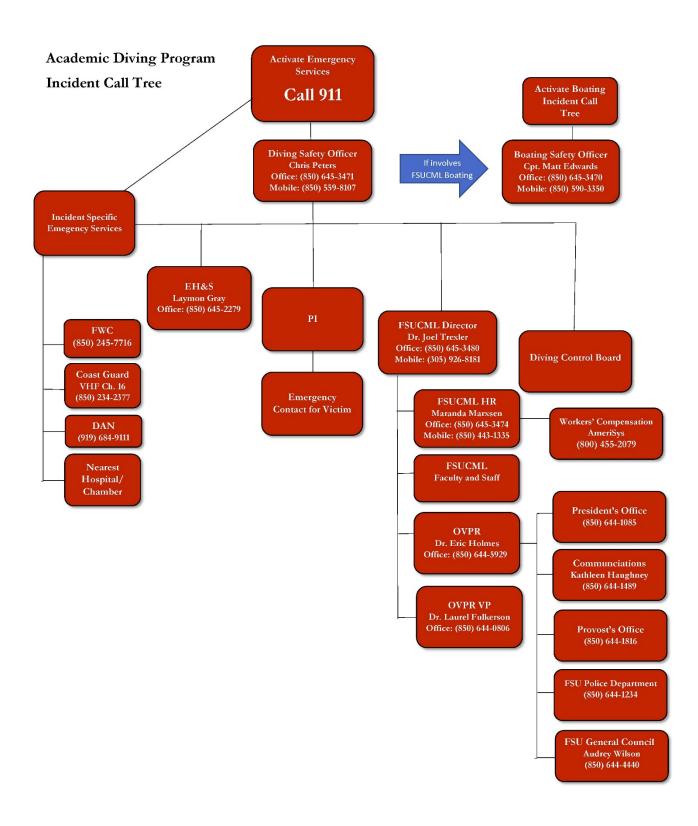

A diving accident victim could be any person who has been breathing air underwater regardless of depth. It is essential that emergency procedures are pre-planned, and that medical treatment is initiated as soon as possible. The following procedures provide guidance for dealing with emergencies that arise during compressed-gas diving. They do not substitute for project supervisors and participants using good judgment. Further, they cannot account for all possible situations. Proper emergency actions rely upon sound training, good judgment, and rapid response.

It is the responsibility of the Lead Diver for each project or dive to establish effective diving emergency procedures for the local diving operations, including evacuation and medical treatment. Divers must report all injuries to the Diving Safety Officer.

## **General Procedures**

- 1. Make appropriate contact with victim or rescue as required.
- 2. Establish (A)irway (B)reathing (C)irculation or (C)irculation (A)irway (B)reathing as appropriate
- 3. Stabilize the victim
- 4. Call 911 or local Emergency Medical System (EMS) for transport to nearest medical treatment facility. Explain the circumstances of the dive incident to the evacuation teams, medics and physicians. Do not assume that they understand why 100% oxygen may be required for the diving accident victim or that recompression treatment may be necessary.
- 5. Administer emergency oxygen or AED if appropriate.
- 6. Contact Divers Alert Network Emergency Hotline (+1 919 684 9111)
- 7. Notify the Diving Safety Officer. If the Diving Safety Officer is not immediately available contact FSU EH&S.
- 8. If possible, complete the following actions:
  - a. Take notes of how the incident occurred, and all response measures taken, including a time table of events and actions;
  - b. Isolate the victim's equipment for inspection by the DSO and authorities;
  - c. Make statements regarding the incident only to University and EMS/Medical personnel. University representatives shall be responsible for providing information to the media.
- 9. As soon as possible, the FSU Diving Safety Officer prepares a diving incident report, including facts of the injury and treatment rendered, and statements from pertinent witnesses. A copy of this report shall be forwarded to the FSU Diving Control Board, the FSU Department of Environmental Health & Safety, the FSU Coastal and Marine Laboratory's Human Resources personnel, and to AAUS or the National Institute for Occupational Safety and Health (NIOSH), depending on the nature of the operation.

## Dive Plan Approval

I certify that this dive plan has been completed in compliance with the Florida State University Diving Control Board policies and procedures. I further certify that all information provided in this plan is true and correct to the best of my knowledge.

All dive logs related to this plan should be returned to the Diving Safety Officer or designee within one week following completion of the planned dives(s). Individuals, within the same period, should enter their dives onto the AAUS website.
